

---

### **LinkStation with firmware 1.20 or later**

- Connect the LinkStation to the Internet.
- Turn the LinkStation off, then turn it back on.
- The LinkStation will update the media server automatically.

Alternativ, you may update the media server manually.

- From a computer connected to the same network as the LinkStation, open the LinkStation's web-based administration interface.
  - Navigate to [Extensions]-[Media Server] and click [Update DTCP-IP].
  - The LinkStation will update the media server.
- 

### **DTCP-IP functionality update: Release Notes**
